Fire Alarms and Mass Notification Systems

These life safety systems protect your people by alerting them when smoke and heat detectors have activated. APS FireCo ensures your systems are NFPA 72 compliant.

Monitoring Systems

These systems connect your fire protection systems to a central monitoring station which can summon emergency services when needed. APS FireCo ensures your systems are NFPA 72 compliant.

Fire Sprinkler Systems

These water-based systems protect your property by automatically activating during a fire. APS FireCo ensures your systems are NFPA 13 and 25 compliant.

Special Hazard Fire Suppression Systems

These gaseous-based systems protect your mission critical assets such as control rooms, data centers, specialized equipment, and records storage. APS FireCo ensures your systems are NFPA 2001 compliant.

First Aid Kits & Safety Equipment

These kits and equipment are available to assist people in an emergency situation. APS FireCo ensures your equipment is NFPA 101 compliant.

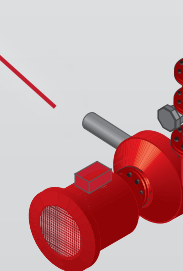

Exit & Emergency Lights

These lights provide guidance and visibility to people during an emergency situation. APS FireCo ensures your lights are NFPA 101 compliant.

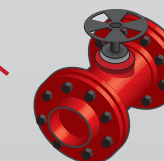

Fire Standpipe and Hose Systems

These water-based systems provide fire hose access to firefighters inside your building. APS FireCo ensures your systems are NFPA 14 compliant.

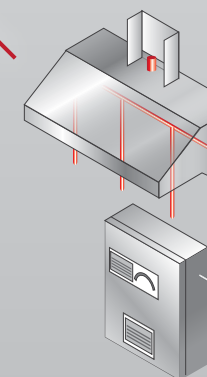

Fire Pumps

These critical components deliver increased water flow to both the fire sprinkler and standpipe systems. APS FireCo ensures your pumps are NFPA 20 compliant.

Backflow Preventers

These assemblies protect your potable water from contamination due to backflow. APS FireCo ensures your backflow preventers are NFPA 13 and 25 compliant.

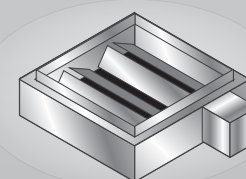

Kitchen Hood Fire Suppression Systems

These wet chemical-based systems protect your commercial cooking operations during an uncontrolled fire. APS FireCo ensures your hoods are NFPA 17a and 96 compliant.

Fire Extinguishers

These devices are available throughout your building to be used to extinguish a controllable fire. APS FireCo ensures your extinguishers are NFPA 10 compliant.

Fire and Smoke Dampers

These products prevent the spread of fire and smoke throughout your building. APS FireCo ensures your dampers are NFPA 80 compliant.
